The Utah Copper Division of Kennecott Copper
Corporation has fulfilled obligations under the Mined Land
Reclamation Act of 1975 (Sec. 40-8, U.C.A., 1963, as
amended), and will employ the following reclamation
techniques on approximately 23,000 acres which comprises
the land affected.

During operation:

- 1) Rock waste will be deposited in designated locations.
- 2) Open pit rock slopes will be stabilized by maintaining
slopes between 26° to 28° from horizontal
with intermittent benching.
- 3) Pit discharge water will be processed and
neutralized, impounded, utilized, or receive safe
disposition.
- 4) Tests will be conducted to determine possible
methods for establishment and types of vegetation
suitable for establishment on some dump areas.
- 5) When excess mine water is present, such water will
be contained in ponds for evaporation.
- 6) Tailings will be contained in a designated pond with
dikes maintained in a stable condition.

After Operation:

- 1) Unusable buildings, scrap lumber, and metal, and
trash will be disposed of from all areas of the land
affected.
- 2) Open pit rock slopes will be stabilized by abandoning
at slopes ranging from 32° to 37°.
- 3) Revegetation for site stabilization will be performed
on specific areas of the land affected where found by
testing to be technically and economically feasible.
- 4) Specific alternatives for eventual use of all portions of
the land affected which have been submitted in the
reclamation plan, will be considered upon
abandonment.

Reclamation performance surety will be established upon
final approval of the reclamation plan.

is hereby requested to submit written protest within 30 days
